

“**STREAM™ ease of use and powerful search function makes the task of assessing a large amount of records very straightforward.**”

VP Technical, Top five aircraft lessor.

STREAM™ Interactive gives you the power to manage your records by combining the latest developments in IT with the power and flexibility of the internet.

In today's global economy, access to standardised, secure records has never been so critical.

STREAM™ Interactive gives you the power and flexibility to make all your Records available online to the right users at the right time.

Description

A STREAM™ Interactive license allows a lessor or bank to gather its records from anywhere in the world utilising its own technical staff or contractors. Authorised users can view existing documents or upload new ones. Safe and secure online hosting ensures that global users share the same information regardless of location or timezone.

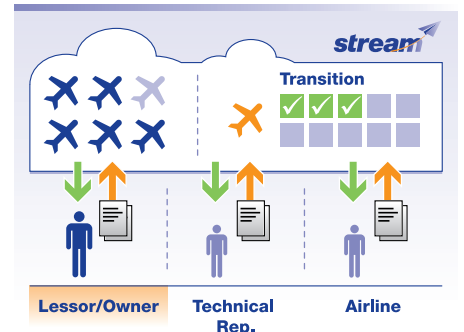

System Requirements

Document scanner, PC & internet connection.

Benefits for Lessors & Banks

- ▶ Remote access available to all Technical Records on demand
- ▶ All users work to the same standard and all documents centrally available
- ▶ Interactive transition management supports online collaboration with stakeholders
- ▶ Transition readiness scoring available for individual aircraft in real-time
- ▶ Records can be shared with potential clients without incurring travel or support costs

STREAM™

**Technical Records on Demand.
For Airlines, Lessors & MROs.**

“Your aircraft and engine records management solution.”

Waviatech Company Background

Waviatech specialise in records management and support for the aviation industry.

We have developed the STREAM™ software and a network of scanning partners to assist with this challenging and increasingly global task.

Since 2002 we have been working with Airlines, Lessors and MROs to deliver our unique combination of services and software.

STREAM™ (Secure Technical Records for Electronic Asset Management)

STREAM™ has been developed by Waviatech to be an industry leading system for managing the ongoing issue of Aircraft and Engine documentation.

Over 300 aircraft equating to \$12.6 billion worth of assets are already protected for lessors and aircraft operators using the STREAM™ system.

Waviatech provides a global scanning and format conversion service or alternatively, records can be routed to our UK bureau for processing. STREAM™ is also available as a licensed software product via STREAM™ Interactive.
