

## **PRESS ANNOUNCEMENT**

### **Waviatech and AerData Announce Strategic Partnership**

**London, June 3<sup>rd</sup> 2008**

Waviatech, the UK-based provider of the Stream Digital Aircraft Records tool have announced a strategic partnership with AerData, the Dutch based provider of software and back office services for aircraft asset managers. This partnership will provide customers with the option to seamlessly link digital aircraft records stored in Waviatech's Stream tool with AerData's aircraft lease management software.

Commenting on the agreement, Godfrey Ryan, Director, Sales and Marketing for Waviatech said: "We are proud to align ourselves with AerData, a new but quickly established player in the aircraft asset management market, providing services to leading banks and lessors. The partnership will deliver synergies for both existing and future mutual customers of Waviatech and AerData."

"Stream has been delivering time savings and enhanced productivity for leasing companies and aircraft owners for many years," said Paul van Tol, Managing Director of AerData. "The ability to link Stream information into AerData will further enhance the product we offer to our customers."

#### **About Waviatech**

Waviatech's mission, with Stream, is to define the global standard for digital aircraft records.

Stream was developed by Waviatech to assist airlines and aircraft leasing companies in managing scanned historical aircraft and engine records. Since 2002 Stream has established itself by delivering high-quality, easy-to-retrieve and searchable digital records. Stream can be accessed on DVD, online or via a corporate network. Waviatech provides a number of services including a global records-scanning/processing service, aircraft technical records audits and aircraft inspection services. More information can be found on [www.waviatech.com](http://www.waviatech.com)

#### **About AerData**

AerData provides lease management software, consulting and backoffice services for aircraft asset managers. Banks and lessors that use AerData have proven to have stronger financial control of leased aircraft assets, reduce exposure by better insight in maintenance cash flows and contract return

conditions and they can reduce costs by outsourcing. The AerData software supports the full asset and lease life cycle and is internet based.
